Micron Rolls Out Hybrid Memory Cube

December 23, 2013 by Rich Brueckner

In this video from SC13, Micron rolls out their Hybrid Memory Cube technology.

> " *With HMC, you can move data up to 15 times faster than with a DDR3 module and use up to 70% less energy and 90% less space than with existing memory technologies. And HMC's abstracted interface and advanced reliability, availability, and serviceability (RAS) capabilities reduce complexity and deliver greater reliability—enabling your innovation and lowering your total cost of ownership like never before.*

INDUSTRY PERSPECTIVES

Kaveri for HPC?

"Some of you might be wondering whether Kaveri is good for HPC applications. Compared to discrete GPUs, applications that are already ported and work well on discrete GPUs will continue to be best run on discrete GPUs. However, Kaveri and HSA will enable many more applications to be GPU accelerated."
